4/28/2025	C	11	Exam, Dog Attack - FINAL Apr 28/2025
-----------	---	----	--------------------------------------

HX: Was out on a walk at 745 AM when an off leash dog, pittie according to the owner, came after Roux. The off leash dog's owner was quickly behind though and was there to help break up the fight.

PE: anxious/nervous today which is unusual; OD ventrolateral aspect scleral injection with no uptake of stain or blepharospasm; some moist areas that look like a dog could've bitten- one in particular over the dorsal cervical region that had a pinpoint bruise but no puncture wound; AD outer pinna had some moisture but no bruising; temp 101.2; AU clear; oral exam unremarkable; no pain and abdominal palpation; no lameness appreciated; no ortho swelling- everything went through ROM normally

Plan: Trauma/Bruising

All very mild, thank goodness, and no need for any medications at this time. Biggest thing may be PTSD requiring a little work. If she seems stoved up tomorrow, we can RX some NSAIDs if she thinks it's needed.

10/10/2023 C 7 EXAM- MISSING HAIR ON L FORELIMB - FINAL Oct 10/2023
O concerned about 3-4 areas of patchy alopecia with brown skin discoloration (no scabs- just what appear to be old bruises potentially) on L forelimb- I inquired about any trauma and O said that "Ella" Self (a GSD owned by Tonia Self) did attack Roux about a week ago (over a toy)- and they fought pretty rough- I suspect these are healing bite wounds and will continue to heal just fine- O was concerned because she just got ROux back from

groomer yesterday and had not noticed the areas before- I suspect they cleaned away some scabbing potentially or disrupted fragile hair that was bound to fall out from the trauma- resulting in acute bald patches noted by O yesterday....

I recommended placing some Neosporin on the areas as needed and not allowing her to lick at the ointment- I also recommended Omega-3 fatty acids (or 1000mg fish oil) to help with hair re-growth and warned O that the hair may or may not regrow a lighter color (like white or grey)-

Gave KC orally as she was due and O req

Follow up only if needed (i.e. if lesions not healed in few weeks)-

8/25/2022 C 7 EXAM - RECK LEG - FINAL Aug 25/2022

O has been diligent in keeping Roux still- today there is no limp- I told O that she may slowly increase activity- she did say she throws ball to fence and Roux runs (into) the fence to get the ball- she has stopped doing this since her injury

O also noted Roux has had diarrhea for 2 days now- she got into a piece of cake on counter day before yesterday- all else wnl though- I recommended a course of metro & pro-pectalin- we also discussed Gas-X for occ gas as well as "puppy itch" as sometimes she is itchy- I see no skin issue today- and no reason to switch foods-

Recheck if needed

8/25/2022	P	7	1.00 [None] of Pro-Pectalin Paste 30ml (232) Rx #: 24123 0 Of 0 Refills Filled by: STA Give 5cc by mouth every 8 hrs as needed for diarrhea / as probiotic
