Additional Information
P diagnosed at RDVM (Towne South) with pancreatitis. P already has an IVC in place and a bag of Normosol. Treatments have been started today. Will continue previous treatments and add metronidazole.

P = Plan
Fluids/Meds Given: Continue Normosol R at 12 ml/hr. Metronidazole 15 mg/kg IV slowly over 20 minutes, repeat in 12 Hours Give Pantoprazole and Cerenia when due, Q 24 hours, see Smartflow chart 6:00 AM: P is BAR, she has had no vomiting or regurgitation overnight, some diarrhea one time. She can go home today on oral Propectalin. Metronidazole 15 mg IV at 7:00 AM

Client Instructions

1) Please feed Finley the bland GI diet that you already have from now on.

2) Please give the oral meds as labeled that you have from Towne South.

3) Monitor for vomiting and diarrhea, and recheck with your regular Vet or here at AEC if her clinical signs do not totally resolve within the next 48 hours.
